

# Openfunds Fields (sorted by OF-ID)

Status: FINAL

Version: Version 1.21  
(Including fields of this and all preceding versions.)

Date: 2017-12-17

Notice: IMPORTANT NOTICE:

-----  
This list (version 1.21.03) contains primarily enhancements due to the MiFID II and PRIIPs regulation. To receive more information about the initiative openfunds, visit <https://www.openfunds.org>.  
-----

In general, openfunds uses lower case for values, i.e. "yes" / "no". However, implementations of interfaces based on the openfunds standard should not be case sensitive as many existing systems use a different diction.  
-----

Please note, that an empty field means "unknown" as a general rule within openfunds. To avoid any deletion of a value in the receiving database, openfunds recommends to use the command "[IGNORE]" instead of a value. (Without quotation marks, but including square brackets. All capital letters).  
-----

Excel knows different ways of formatting percentage figures. As some of them might not convert properly into decimal figures, openfunds strongly recommends using decimal figures only.

Description Specifies the national label of the Legal Form OFST160100 in English or in national language where appropriate. Usually the value of this field can be deducted by knowing the fund's Domicile (OFST010010 or OFST010011) and its Legal Form (OFST160100). However, there are a few exceptions from this rule. One is "Company with variable capital (SICAV)" in Germany, as there exist two possible values "Investmentaktiengesellschaft (InvAG) mit veränderlichem Kapital (KAGB §108ff)" or "Offene Investmentkommanditgesellschaft (InvKG) (KAGB §124ff)". Two other exceptions are "Open-Ended Investment Company (OEIC)" in United Kingdom and Ireland as for both countries there are two possible values. First "Open-ended investment company (OEIC)" or second "Investment company with variable capital (ICVC)". Please note that even for an Irish or British ICVC one should choose: "Open-Ended Investment Company (OEIC)".

This field helps to determine the appropriate value of "OFST160100 Legal Form". Therefore, its main purpose is the allocation of national nomenclatures to the values mentioned in field "OFST160100 Legal Form". This field is for information only. It is not recommended for data transmission.

Data Type	string	Introduced / Revoked	0.86 / --
Description	<p>Some funds allow to invest into the fund not only by buying a specific number of shares, but also by investing a specific amount of money. A subscription for a specific amount of money usually implies, that one can invest in fractions of a share class unit. For instance, assume that a share class of a fund costs 125 currency units. If it is only possible to buy a specific number of shares, "shares" is the right choice. If it is possible to invest 200 currency units equivalent of 1.6 shares of the fund, than "amount" is the answer. If both ways are possible, please use "shares and amount".</p> <p>In case there is no minimal subscription neither for initial nor for subsequent subscriptions, please choose "shares" and insert the number '0' (zero) into the following linked fields:          -OFST400220 Minimal Initial Subscription In Shares          -OFST400250 Minimal Subsequent Subscription In Shares</p>

The direction of the swing is determined by the net capital activity of the day.</p> <p>"partial swing NAV": The NAV only swings if a predetermined net capital activity threshold (the swing threshold) is exceeded on a dealing day. As with full swing the direction of the swing is determined by the net capital activity of the day. Partial swing can also be referred to as semi-swing pricing.</p> <p>In the cases (b) and (c) above the two resulting NAV are also referred to as the transaction price (swing price) and the valuation price (unswung price).</p>

Description	<p>This field specifies the dates within the selected period. For a weekly period (OFST425561 Redemption Trade Cycle Period = "weekly") you can choose one or more weekdays or the first or last business day of the week. The values "1st business day" and "Mo" differ as "1st business day" would shift Monday to Tuesday in case Monday is a banking holiday. The same is true for "last business day" and "Fr" as "last business day" would shift Friday to Thursday. If weekly redemptions are possible on more than one weekday within the week (OFST425563 Number Of Possible Redemptions Within Period &gt; 1), you should combine these values by using a pipe " " (ASCII 124). You can combine any weekday with another weekday and also the two values "1st business day" and "last business day". However, you should not combine a weekday with one of the two values "1st business day" or "last business day" as this might lead to contradictory values.</p> <p>More information about trade cycles can be obtained by downloading the whitepaper at <a href="https://www.openfunds.org/en/trade-cycle">https://www.openfunds.org/en/trade-cycle</a></p>

Description	<p>Further specification of the type of registration in a specific country. Usually the data-ID has to be changed and XX has to be replaced with the two digit ISO country code in a flat file layout. If used as OFST605000 (XX replaced by number 00) file layout changes from a "flat file layout" to a "narrow file layout". Narrow file layout means that there is a separate line for each country that is specified in column OFST600000. In a narrow file layout there will be a separate line for each country were the share class is registered for sale.</p> <p>In many cases this field can be derived from a set of other fields, i.e. OFST010010 Fund Domicile Alpha 2, OFST160100 Legal Form, OFST160150 Home Country Legal Type Of Fund, OFST6100XX Has Country Representative, etc.. You can find some country specific values in the following table (more countries to follow).</p> <p>A comprehensive description can be downloaded from <a href="https://www.openfunds.org/fields/CountrySpecificRestrictions.pdf">https://www.openfunds.org/fields/CountrySpecificRestrictions.pdf</a></p>
