

# Openfunds Fields (sorted by OF-ID)

Status: FINAL

Version: Version 1.25.1  
(Including fields of this and all preceding versions.)

Date: 2019-08-22

Notice: IMPORTANT NOTICE:

-----  
With this list (version 1.25.1) new fields have been added due to regulatory changes in Asia. In addition, some minor changes have been made to existing fields. To receive more information about the initiative openfunds, visit <https://www.openfunds.org>.

-----  
In general, openfunds uses lower case for values, i.e. "yes" / "no". However, implementations of interfaces based on the openfunds standard should not be case sensitive as many existing systems use a different diction.

-----  
Please note, that an empty field means "unknown" as a general rule within openfunds. To avoid any deletion of a value in the receiving database, openfunds recommends to use the command "[IGNORE]" instead of a value. (Without quotation marks, but including square brackets. All capital letters).

-----  
Excel knows different ways of formatting percentage figures. As some of them might not convert properly into decimal figures, openfunds strongly recommends using decimal figures only.

-----  
Please note that fields that are no longer supported are now marked at the top of the field description and no longer at the bottom.

Commonly used standard time formats are:

- EST Eastern Time Zone (USA); UTC-05:00
- CST Central Time Zone (USA); UTC-06:00
- PST Pacific Time Zone (USA); UTC-07:00
- CET Central European Time; UTC+01:00
- HKT Hong Kong Time; UTC+08:00
- SST Singapore Standard Time; UTC+08:00

Please note, that mentioning the abbreviation of a standard time zone is an approximation as there are many countries that know daylight saving time. In this case openfunds would assume only mentioning one abbreviation, e.g. CET for Central European Time, despite between March and October it should be CEST for Central European Summer Time. Additionally, openfunds recommends not to use this field for automatic implementation, as there are quite some identical abbreviations for different time zones, e.g. ADT stands for Arabia Daylight Time (UTC+3:00) or Atlantic Daylight Time (UTC-3:00).

Field Tags	Key Fact: Share Class   Codes   Hybrid Field		
Field Level	Fund		Link Reference
Data Type	string		Introduced / Revoked 0.87 / --
Description	<p>An unique alpha-numeric string that is equal for all share classes of a fund. Usually this field is populated with the proprietary share class key of the fund company's database. This field helps to decide whether a new ISIN represents a new fund or a new share class of an existing fund.</p> <p>This field is a 'Hybrid Field', meaning that the recipient may change it in its database. Therefore, it can be used for consistency checks only for one specific transmission between sender and recipient. Otherwise there is a risk, that in the sender's database there are conflicting consolidation keys from different senders.</p>		
Values	Any unique alpha-numeric string (per fund house) that is equal for all share classes of a fund.

OF-ID	<b>OFST020560</b>	Field Name	<b>Share Class Launch Date</b>
Field Tags	Key Fact: Share Class		
Field Level	Share Class	Link Reference	OFST010240
Data Type	date	Introduced / Revoked	0.85 / --
Description	Launch date of the share class. This field is linked to "OFST010240 Fund Launch Date" as the launch date of this share class must not be elder than the fund's launch date.		

To distinguish launch date from inception date, openfunds defines these two often synonymously used terms as follows:

- 1) Launch date: offering period is closed and a net asset value (NAV) is calculated.
- 2) Inception date: date when share class juridically came into existence. Usually there will be an offering period. In this case the inception date would be equal to the "OFST020558 Subscription Period Start Date". However, there might be situations without offering periods, i.e. if there was a fund merger. In this case the inception date would be the "OFST020560 Share Class Launch Date".

Data Type	string	Introduced / Revoked	0.88 / --
Description	<p>Specifies the national label of the Legal Form OFST160100 in English or in national language where appropriate. Usually the value of this field can be deducted by knowing the fund's Domicile (OFST010010 or OFST010011) and its Legal Form (OFST160100). However, there are a few exceptions from this rule.</p> <p>One is "Company with variable capital (SICAV)" in Germany, as there exist two possible values "Investmentaktiengesellschaft (InvAG) mit veränderlichem Kapital (KAGB §108ff)" or "Offene Investmentkommanditgesellschaft (InvKG) (KAGB §124ff)".</p> <p>Two other exceptions are "Open-Ended Investment Company (OEIC)" in United Kingdom and Ireland as for both countries there are two possible values. First "Open-ended investment company (OEIC)" or second "Investment company with variable capital (ICVC)". Please note that even for an Irish or British ICVC one should choose: "Open-Ended Investment Company (OEIC)".</p> <p>This field helps to determine the appropriate value of "OFST160100 Legal Form". OF-ID	<b>OFST400200</b>	Field Name	<b>Minimal Subscription Category</b>
Field Tags	Purchase information   Execution data		
Field Level	Share Class	Link Reference	
Data Type	string	Introduced / Revoked	0.86 / --
Description	<p>Investments into a share class may be subject to a minimum requirement, as set forth in the prospectus – such as buying a specific number of shares, or also by investing a specific amount of money. A subscription requirement for a specific amount of money usually implies that one can invest in fractions of a share class unit, so long as the minimum amount of money is met. For instance, assume that a share class of a fund costs 125 currency units. If investors are required to buy a specific number of shares, "shares" is the right choice. If, however, the requirement is to invest 200 currency units, then "amount" is the answer.</p> <p>In exceptional cases the prospectus mentions different requirements for initial and subsequent subscriptions. For example, a minimum of 1,000 currency units are required for initial subscription, and subsequent subscriptions must be of at least 10 shares. Such combination is reflected as "shares and amount". In case the prospectus only mentions as an example: "Minimum investment is 10,000 currency units or equivalent in shares...", openfunds expects indication of "amount" only.</p> <p>In case there is no minimal subscription neither for initial nor for subsequent subscriptions, please choose "shares and amount" and insert the number '0' (zero) into the following linked fields:</p> <ul style="list-style-type: none"> <li>- OFST400220 Minimal Initial Subscription In Shares</li> <li>- OFST400250 Minimal Subsequent Subscription In Shares</li> <li>- OFST400230 Minimal Initial Subscription In Amount</li> <li>- OFST400260 Minimal Subsequent Subscription In Amount</li> </ul>

Description	In general there are "Dual Priced Funds" and "Single Pricing Funds".			
	<p>The value "dual pricing" refers to a fund, which calculates two NAVs, firstly the so-called "offer price", a NAV for subscribers derived from underlying security offer prices and secondly the so-called "bid price", a NAV for redeemers, derived from underlying security bid prices.</p> <p>A "single pricing" fund calculates only one single NAV per share, which is used for all capital activities regardless whether inflows or outflows are affected. Description	<p>The list of values for this data point are (a) "no swing NAV", (b) "full swing NAV" and (c) "partial swing NAV". They refer to the Value "single pricing" in field "OFST401002 Pricing Methodology".</p> <p>"no swing NAV": A fund which calculates only one single NAV per share which is used for all capital activities and does not apply a swing factor.</p> <p>"full swing NAV": The unswung NAV is adjusted each time there is capital activity, irrespective of its size or significance to the fund. The direction of the swing is determined by the net capital activity of the day.</p> <p>"partial swing NAV": The NAV only swings if a predetermined net capital activity threshold (the swing threshold) is exceeded on a dealing day. As with full swing the direction of the swing is determined by the net capital activity of the day. Partial swing can also be referred to as semi-swing pricing.</p> <p>In the cases (b) and © above the two resulting NAV are also referred to as the transaction price (swing price) and the valuation price (unswung price).</p>

Data Type	string		Introduced / Revoked	1.2 / --
Description	<p>This field specifies the dates within the selected period. For a weekly period (OFST405521 Subscription Trade Cycle Period "weekly") you can choose one or more weekdays or the first or last business day of the week. In general, there is a difference between "1st business day" / weekdays and "last business day". For instance, "last business day" would shift Friday to Thursday and the value "Fr" would shift Friday to Monday in case Friday is a banking holiday.</p> <p>If weekly subscriptions are possible on more than one weekday within the week (OFST405563 Number Of Possible Subscriptions Within Period &gt; 1), you should combine these values by using a pipe " " (ASCII 124). You can combine any weekday with another weekday and also the two values "1st businessday" and "last business day". However, you should not combine a weekday with one of the two values "1st business day" or "last business day" as this might lead to contradictory values.</p> <p>In case of irregular subscription dealing days please use the field "OFST405532 Irregular Subscription Dealing Days".</p> <p>More information about trade cycles can be obtained by downloading the whitepaper at <a href="https://www.openfunds.org/en/trade-cycle">https://www.openfunds.org/en/trade-cycle</a></p>

OF-ID	<b>OFST425565</b>	Field Name	<b>Weekly Redemption Dealing Days</b>	
Field Tags	Key Fact: Share Class   Execution data			
Field Level	Share Class		Link Reference	OFST425563
Data Type	string		Introduced / Revoked	1.2 / --
Description	This field specifies the dates within the selected period. For a weekly period(OFST425561 Redemption Trade Cycle Period "weekly") you can choose one or more weekdays or the first or last business day of the week. In gener, there is a difference between "1st business day" / weekdays and "last business day". For instance, "last business day" would shift Friday to Thursday and the value "Fr" would shift Friday to Monday in case Friday is a banking holiday. If weekly redemptions are possible on more than one weekday within the week (OFST425563 Number Of Possible Redemptions Within Period > 1), you should combine these values by using a pipe " " (ASCII 124). You can combine any weekday with another weekday and also the two values "1st businessday" and "last business day". However, you should not combine a weekday with one of the two values "1st business day" or "last business day" as this might lead to contradictory values. In case of irregular redemption dealing days, please us the field "OFST425572 Irregular Redemption Dealing Days". More information about trade cycle can be obtained by downloading the whitepaper at <a href="https://www.openfunds.org/en/trade-cycle">https://www.openfunds.org/en/trade-cycle</a> .

Description	//Please note that this field is under investigation and maybe set as no longer supported in one of the next versions.//		

The maximal intended percentage of NAV investing in complex bond in the next 12 months. Please note that this field is an Asia specific requirement.

According to the HK SFC complex bonds refers to bonds with special features, including:

- That are perpetual in nature and interest pay-out depends on the viability of the issuer in the very long term;
- That have subordinated ranking and in case of liquidation of the issuer, investors can only get back the principal after other senior creditors are paid;
- That have variable and/or deferral of interest payment terms and investors would face uncertainty over the amount and time of the interest payments to be received;
- That have extendable maturity dates and investors would not have a definite schedule of principal repayment;
- That are convertible or exchangeable in nature and investors are subject to both equity and bond investment risk; and/or
- That have contingent write down or loss absorption feature and the bond may be written-off fully or partially or converted to common stock on the occurrence of a trigger event.
- Those with multiple credit support providers and structures
- Bonds comprising one or more special features

Field Tags	Key Fact: Share Class   Taxes   Country specific field		
Field Level	Share Class	Link Reference	
Data Type	boolean	Introduced / Revoked	1.2 / --
Description	<p>Does the fund fulfill the requirements for 'traspaso'? For that the fund has to be registered in Spain (OFST6030ES = yes) and if it is not a FCP but a SICAV there must be more than 500 investors. This fiscal regulation applies only to international regulated funds (=SICAVs) registered for sale in Spain. The number is counted at fund level. Thus, if a fund has in total more than 500 shareholders ALL shares classes (provided they are registered in Spain) are considered capital gain tax exempt. The Spanish word "traspaso" makes reference to transfer implying money can be transferred between funds without paying capital gain tax.</p> <p>Please be aware, that all Spanish domestic funds and all FCPs registered in Spain must be set to "yes" by default.</p>
