

Openfunds Fields (sorted by OF-ID)

Status: FINAL

Version: Version 1.26.2
(Including fields of this version only.)

Date: 2020-07-20

Notice: IMPORTANT NOTICE:

With this list (version 1.26.2) changes have been made to fields included in or related to the FinDatEx European MiFID and PRIIPs templates. All openfunds fields analogous to those in the two templates have been moved to or newly created in the two new openfunds field ranges prefixed OFEM and OFEP for EMT (European MiFID Template) and EPT (European PRIIPs Template) respectively. Several fields that were included in the openfunds MiFID/PRIIPs field set but that were not part of the EMT or EPT have been moved to NLS ("no longer supported") status. Please note that the changes in this version have not addressed any fields specific to the CEPT (Comfort European PRIIPs Template). To receive more information about the initiative openfunds, visit <https://www.openfunds.org>.

In general, openfunds uses lower case for values, i.e. "yes" / "no". However, implementations of interfaces based on the openfunds standard should not be case sensitive as many existing systems use a different diction.

Please note, that as a general rule an empty field means "unknown" within openfunds. To avoid any deletion of a value in the receiving database, openfunds recommends using the command "[IGNORE]" instead of a value. (Without quotation marks but including square brackets. All capital letters).

The ISO 8601 standard for datetimes (https://www.iso.org/iso-8601-date-and-time-format.html) does not allow any spaces in dates, so they use formats such as YYYYMMDDhhmmss (e.g. 20201231143000) or use T as a date/time separator and hyphens or colons to separate parts of the expression (e.g. 2020-12-31T14:30:00). The EMT breaks from this standard only in using a space as the date/time separator.</p> <p>//The correspondent MiFID II field introduced by the European Working Group with their MiFID Data Dictionary Template (EMT) is: EMT: 00005_File_Generation_Date_And_Time.
