

# Openfunds Fields (sorted by OF-ID)

Status: DRAFT

Version: Version 1.27  
(Including fields of this and all preceding versions.)

Date: 2021-06-11

Notice: IMPORTANT NOTICE:

-----  
With this list (version 1.27) various data has been added, including two new field ranges: OFPHxxxxxx – Portfolio Holdings and OFEFxxxxxx – European Feedback Template. To receive more information about the initiative openfunds, visit <https://www.openfunds.org>.  
-----

In general, openfunds uses lower case for values, i.e. “yes” / “no”. However, implementations of interfaces based on the openfunds standard should not be case sensitive as many existing systems use a different diction.  
-----

Please note, that as a general rule an empty field means “unknown” within openfunds. To avoid any deletion of a value in the receiving database, openfunds recommends using the command “[IGNORE]” instead of a value. (Without quotation marks but including square brackets. All capital letters).  
-----

Excel knows different ways of formatting percentage figures. As some of them might not convert properly into decimal figures, openfunds strongly recommends using decimal figures only.  
-----

Please note that fields that are no longer supported are now marked at the top of the field description and no longer at the bottom.

Field Tags	No longer supported field   Key Fact: Share Class			
Field Level	Share Class		Link Reference	
Data Type	string		Introduced / Revoked	0.92 / 1.26
Description	//No longer supported. Please use "OFST020261 Currency Hedge Share Class" instead.//  Is there a currency hedge on this share class?  Please note, that this field relates only to a currency hedge on share class level. This can be a total currency hedge to the OFST010410 Fund Currency or a residual hedge in order to avoid over hedging.  To describe the kind of currency hedges within a portfolio, please refer to field "OFST010210 Portfolio Currency Hedge" (fund level).  If there is a 100% NAV hedge (this field answered with "yes, 100% NAV hedge"), the performance in "OFST020540 Share Class Currency" equals the performance in "OFST010410 Fund Currency" adjusted for the interest rate differential minus hedge costs.  If the fund manager wants to avoid overhedging, he will do a residual hedge ("yes, residual hedge"). In this case he will only hedge the proportion of the share class not invested in the currency of the Share Class Currency (OFST020540).  For more information please refer to the white paper: "Hedging" that can be found under <a href="https://www.openfunds.org/en/hedging">https://www.openfunds.org/en/hedging</a> .

Description	<p>//No longer supported. This field is only relevant to EMT 2.0 and is not used in EMT 3.0//</p> <p>Funds may leverage their investments. To do so they have to raise a loan and hence have to pay interests. These interest plus additional commissions sum up to the Ex-post Gearing Costs for a specific period. In this field the ex-post financing costs related to the borrowing for the purposes of gearing should be indicated expressed as a percentage of the NAV. This is only applicable, if the fund allows gearing. Gearing costs are included either in ongoing costs, transaction costs or in the market value. Most likely to apply to closed-ended funds with borrowing costs.</p> <p>//The correspondent MiFID II field introduced by the European Working Group with their MiFID Data Dictionary Template (EMT) is:  EMT: 08075_Financial_Instrument_Gearing_costs_ex_post//</p>
