

# Openfunds Fields (sorted by OF-ID)

Status: FINAL

Version: Version 2.12.0

(Including fields of this and all preceding versions.)

Date: 2025-09-30

Notice: IMPORTANT NOTICE:

-----  
With this list (version 2.12.0), new fields covering UK Overseas Fund Regime (OFR), the AMAS self-regulation on sustainability, price currency in minor units, trading price frequency, the signatory verification of ACT and an expanded set of holding attributes are covered. This version also contains corrections of errors and various minor updates. To receive more information about the openfunds initiative, visit <https://www.openfunds.org>.  
-----

In general, openfunds uses lower case for values, i.e. "yes" / "no". However, implementations of interfaces based on the openfunds standard should not be case sensitive as many existing systems use a different diction.  
-----

Please note, that as a general rule an empty field means "unknown" within openfunds. To avoid any deletion of a value in the receiving database, openfunds recommends using the command "[IGNORE]" instead of a value. (Without quotation marks but including square brackets. All capital letters).  
-----

Excel knows different ways of formatting percentage figures. As some of them might not convert properly into decimal figures, openfunds strongly recommends using decimal figures only.
